

/* EXTERNAL VARIABLE */

```
#include<iostream.h>
#include<conio.h>
void example();
void main()
{
    clrscr();
    int num = 10;
    cout<<num;
    getch();
}
int num;
void example()
{
    num = num +10;
    cout<<num;
}
```

The output of the above program is:-
10
