

```
/* STATIC VARIABLE */  
  
#include<iostream.h>  
#include<conio.h>  
void example();  
void main()  
{  
    int i;  
    clrscr();  
    for(i=0;i<=3;i++)  
    {  
        example();  
    }  
    getch();  
}  
void example()  
{  
    static int x = 10;           //local static variable  
    x = x + 10;  
    cout<<x<<"\t";  
}
```

The output of the above program is:-

20      30      40      50
